Contents of Volume 38 (1999)

Allwright DJ → Hassell DC

Bees MA, Hill NA: Non-linear bioconvection in a deep suspension of gyrotactic swimming micro-organisms 135
Briggs CJ, Nisbet RM, Murdoch WW: Delayed feedback and multiple attractors in a host–parasitoid system 317
Brunovský P → Nagylaki T

Chen X, Hastings SP: Pulse waves for a semi-discrete Morris-Lecar type model 1

Deng B: Glucose-induced period-doubling cascade in the electrical activity of pancreatic β-cells 21

Edelstein-Keshet L → Mogilner A
Esteva L, Vargas C: A model for dengue disease with variable human population 220

Fowler AC → Hassell DC
Friedman A, Reitich F: Analysis of a mathematical model for the growth of tumors 262

Gomulkiewicz R → LoFaro T
Grünbaum D: Advection–diffusion equations for generalized tactic searching behaviors 169

Hallam TG → Lika K
Happel R → Stadler PF
Happel R, Stadler PF: Autocatalytic replication in a CSTR and constant organization 422
Hassell DC, Allwright DJ, Fowler AC: A mathematical analysis of Jones's site model for spruce budworm infestations 377
Hastings SP → Chen X
Hill NA → Bees MA
Hofbauer J → Nagylaki T

Kopell N → LoFaro T

Lasota A, Mackey MC: Cell division and the stability of cellular populations 241
Lika K, Hallam TG: Traveling wave solutions of a nonlinear reaction–advection equation 346
Lizana M, Padron V: A spatially discrete model for aggregating populations 79
LoFaro T, Gomulkiewicz R: Adaptation versus migration in demographically unstable populations 571
LoFaro T, Kopell N: Timing regulation in a network reduced from voltage-gated equations to a one-dimensional map 479
Lubkin SR → Tyson R

Mackey MC → Lasota A
Mackey MC, Rudnicki R: A new criterion for the global stability of simultaneous cell replication and maturation processes 195
Mogilner A, Edelstein-Keshet L: A non-local model for a swarm 534
Murdoch WW → Briggs CJ
Murray JD → Tyson R

Nagylaki T, Hofbauer J, Brunovský P: Convergence of multilocus systems under weak epistasis or weak selection 103
Nisbet RM → Briggs CJ

Padron V → Lizana M

Reitich F → Friedman A
Rudnicki R → Mackey MC

Stadler PF → Happel R
Stadler PF, Happel R: Random field models for fitness landscapes 435

Tyson R, Lubkin SR, Murray JD: Model and analysis of chemotactic bacterial patterns in a liquid medium 359

Vargas C → Esteva L

Wolkowicz GSK, Xia H, Wu J: Global dynamics of a chemostat competition model with distributed delay 285
Wu J → Wolkowicz GSK

Xia H → Wolkowicz GSK
